Title: Regarding railway projects causing discontent among farmers - laid.

SHRI SHRINIWAS DADASAHEB PATIL (SATARA): The present work being carried out by the railways is causing great discontent among the farmers. Reasons being there are rampant discrepancies in the land maps, records and drawings used by railways, the official maps and records available with the district revenue department and the actual ground situation.

In spite of the fact that the farmers have expressed their willingness to cooperate with the project after due completion of the land acquisition process, it seems that the railways has started work based on some arbitrary maps and records without confirming them with local revenue authorities, without clearly demarcating the railway boundaries or without completing the land acquisition process.

You are requested to direct the concerned railway authorities to reconcile the land records with the revenue department and complete the process.
