Title: Regarding RRB NTPC Result-laid.

SHRI SHYAM SINGH YADAV (JAUNPUR): In Railway RRB NTPC intermediate and railway NTPC graduate level exam, gross discrepancies have been found.

The following alleged discrepancies have come to the light -

1. According to the advertisement, the number of students to be short-listed should have been 20 times of vacancies but in the result the number of students short-listed is only 11 times of the vacancies.
2. One student roll number is occurring multiple times in the result list. So, in the result, the number of students short-listed is not even 11 times of vacancies.
3. Intermediate level candidate and graduate level students were made to take one exam. Although according to the advertisement, there should have been two exams. So, intermediate level candidates suffered.

I demand that there should be-

- (1) One result for 1 candidate.
- (2) Number of students short-listed should be 20 times of vacancies.
- (3) One student should be able to apply for multiple posts. Earlier this provision was there. But, now one student can apply only for one post.
