Title: Regarding the catastrophic effects of cyclone Nisarga in Maharashtra -laid.

**\*m01**

**SHRI SUNIL DATTATRAY TATKARE ( RAIGAD )** : This is to bring to your kind notice that the recent Severe Cyclonic Storm 'Nisarga' which hit coastal parts of Konkan region in Maharashtra on 3rd June 2020 is the worst catastrophic phenomenon since 1891. It was also the first cyclone that had an impact on Mumbai since cyclone 'Phyon' had hit it in 2009. Nisarga originated as a depression in the Arabian Sea, moved generally northward and later turned northeast, ultimately making a landfall in Raigad between Shrivardhan-Murud-Alibaug Taluka. As Nisarga weakened once inland, it dissipated on 4th June but not before wreaking havoc in Raigad district in Maharashtra.
