Title: Regarding setting up of task force to take care of Corona Patients.

***SHRI GIRISH BHALCHANDRA BAPAT (PUNE)** : In my city Pune, the ill effects of this Corona pandemic are growing day by day. Around 1500 to 2000 people are getting infected on daily basis. The mortality rate is around 70 to 80%. By considering the total population of Pune city, district and Pimpri-chinchwad, the people are very much scared due to growing number of patients. The State Government, Municipal Corporation are fulfilling their own responsibilities and I do not want to blame anybody.

Today, Pune is at number one position in Maharashtra. But, we really do not want to top this list of Corona patients as we have already topped in the sectors of IT, education and industry. The State Government has appointed 20 IAS officers in Corona management team. But, no concrete work has been done as they lack co-ordination. No sufficient number of ventilators, oxygen cylinders, beds and ambulances are available and that is why I would like to request the Union Government to set up a task force to take care of Corona patients and to save the residents of Pune.

Thank you.
