Title: Regarding setting up a Siddha medicine factory for processing Myrobalan in Kalvarayan hills.

***SHRI GAUTHAM SIGAMANI PON (KALLAKURICHI):** Hon. Speaker Sir, Vanakkam. In my Kallakkurichi parliamentary constituency, in Kalvarayan hills, there are 300 tribal villages. As many as 30000 Scheduled Tribes people live there. Kadukkai, Myrobalan is cultivated in more than 1000 acres in that area. This Myrobalan is being transported to different places and States. But the Tribal people are not benefited by the cultivation of Myrobalan. This has the medicinal value and used as a medicine curing so many diseases. This Myrobalan is used in Siddha form of medicine as well. If a Siddha medicine factory for processing myrobalan is set up in this Kalvarayan hills area, it will be helpful the Tribes living there. Since there go to Andhra Pradesh for cutting red sandalwood trees, several cases are registered against them putting their lives at danger. I therefore request that a Siddha medicine factory for processing Myrobalan (Kadukkai) should be set up in Kalvarayan hills in my constituency. Thank you
