Title: Regarding drinking water problem of Kalaburgai in Karnataka-laid.

**DR. UMESH G. JADHAV (GULBARGA):** The city of Kalaburagi which is home to the regional administration has a population of 30 lakh people and facing the problem of drinking water. The Almatti Dam is in the vicinity of Kalaburagi city and many of its canals pass through the district of Kalaburagi. In order to find permanent solution to the drinking water problem forever, it is feasible to augment water from nearby Almatti dam.

I, therefore, urge the Hon'ble Minister of Jal Shakti to kindly make the facility of drinking water for Kalaburagi city from Almatti Dam in Bagalkot District.
