Title: Need to include Kolar Parliamentary Constituency in Jal Shakti Abhiyan Project -laid.

SHRI S. MUNISWAMY (KOLAR): Good percentage of Kolar Lok Sabha constituency in Karnataka is agricultural lands. Due to the absence of less rain and water resources, Kolar is facing drought. As a result most of the agricultural lands are useless and the farmers can't make a fruitful harvest. In several areas of Kolar, people are facing drinking water problems also. If there is Jal Shakti Abayan in Kolar, the area can overcome drought and drinking water problems. Jal shakti Abayan can protect the water resources and can collect the water for future usages. For solving drinking water problems, supply water in affected areas and ensure necessary steps for the same. Some interventions are needed there to overcome drought like KC Valley Projects, large number of check dams, Multi - Arch dams, water conservation, water harvesting structures, but interventions alone can't overcome drought.

So I kindly request the Government to please include Kolar Lok Sabha Constituency in "Jal Shakti Abhiyan Project".
