Title: Regarding tackling unemployment problem in the country -laid.

PROF. SOUGATA RAY (DUM DUM): Unemployment has been considered as one of the biggest problems of India. It is impossible to imagine a better India with such a big number of unemployed youths in the country. The reasons for this Unemployment scenario are: high population, defective education system, excessive burden on agriculture, low productivity in agriculture sector combined with lack of alternative opportunities for agricultural worker, unskilled workforce etc. Though education level in the recent years has improved, skill development is still a crucial issue. India has the largest population of youth in the world. Around 65 per cent population of the country is under the age of 35, so the impact of declining financial market and the lack of job opportunities has the worst effect in the country. Government should also encourage and develop Industrialization and agriculture-based industries especially in rural areas so that the rural candidates don't migrate to the urban areas. But the best solution to the unemployment is encouraging entrepreneurship among the youth of country. Entrepreneurs generate employments to many in a country. I urge upon the government to take immediate steps to tackle the unemployment problem of the country; otherwise the youth may get attracted to the anti-social activities for their livelihood.
