Title:Regarding plight of Indian Students enrolled in various universities in Ukraine-laid

**SHRI T. N. PRATHAPAN (THRISSUR):** Around 20,000 Indian students are back in the country from the war torn Ukraine. There were medical, engineering and aeronautical engineering students from India in various universities of Ukraine. All these students are in a deep desperation as their educational future is already doomed in a war torn country. None of them can go back to their institutions after all the mess, trauma and hurdles they faced in this Russian war in Ukraine. The GOI should facilitate all educational possibilities for all those who want to continue their education in India. After completion of the course, they will be ready for FMG Eligibility Examinations. It is a matter of future of the thousands of Indian talents which should not be neglected. And after all the trauma they faced amidst the war and terror, their case must be considered now, otherwise, it will be a terrible injustice towards them.
