Title: Regarding Creation of Indian Medical Administrative Service Cadre- Laid.

SHRIMATI APARUPA PODDAR (ARAMBAGH): I wish to raise the issue of formation of Indian Medical Administrative Service cadre. The huge and herculean task of managing health needs of 1.4 billion people needs participation of doctors in Medical administration at National level. So many years of Independence signifies lack of inputs from doctors who can understand and provide adequate and prompt solution to the Government on all health related aspects through key health policies. So formation of Indian Medical Administration service cadre or Indian Medical Service Cadre is the need of the hour.
