

<i>Year</i>	<i>Rs. crores</i>	
	<i>Estimates of Net Savings at current prices</i>	
	<i>RBI</i>	<i>CSO</i>
1980-81	16,698	16,699
1988-89	40,672	44,208
1989-90	47,547	50,387

(b) The broad reasons for difference in the estimates of net Savings by the two Organisations are:

- (i) The RBI prepares its estimates in October/November for publication in the Report on Currency and Finance, whereas, the CSO prepares its annual estimates in January/February. Thus with the availability of more recent data the CSO estimates differ from the estimates prepared by the RBI which are based on earlier data. This difference in timing of publication results in differences in the estimates in respect of public sector and household savings.

- (ii) Differences in the estimates of private corporate savings are due to timing of publication as well as the different methods of estimation adopted by the two Organisations.

Rural Hut Insurance Scheme

4776. SHRI V. SOBHANADREESWARA RAO VADDE: Will the Minister of FINANCE be pleased to state:
