The Board of the FCI considered the proposal in November 1975 and decided to refer the proposal to Government since it involved a general question of policy. The proposal was not accepted by the Government on the ground that this would have been a departure from the general instructions of the Government regarding the revised scales. Under these instructions, the project allowance with reference to the revised scales is to be paid only at the new rates which were lower than the earlier rates. However, where project allowance was already being paid, the same was to continue at the old rates but only on the pre-revised scales.
