

Need to construct a subway at Dhulian Ganga Railway station at Murshidabad ? laid

SHRI KHALILUR RAHAMAN (JANGIPUR): I would like to draw the attention of Government towards casualties, and jams happening near all three-railway crossings (Lock gate No- 45/C/T; 44/SPL/T; 43/SPL/E) surrounding Dhulian Ganga Railway Station at Murshidabad District throughout the day due to frequent closure of railway gates. We have noticed that despite the highest density of population, for every closure of the railway gate for 5 mins, thousands of vehicles passersby were caught in a jam badly. Very serious patients traveling by ambulance are also caught in jams regularly. Death in ambulances happen frequently. Despite several requests made earlier, no proper action has been taken in this regard. Dhulian being the busiest town and the gateway to Jharkhand State, students, passenger vehicles, transport vehicles, patients, and ambulances are caught in jams on a regular basis. In the current situation, construction of a subway in one of the railway crossings has become the need of the hour to avoid unintended mishappening. I strongly demand to take necessary action in this regard.
