

*hRegarding establishment of an Employees State Insurance (ESI) dispensary in Sirsa Parliamentary Constituency-laid

SUSHRI SUNITA DUGGAL (SIRSA): I wish to address an issue of utmost significance that affects the well being of the working-class citizens in my Parliamentary Constituency. I earnestly request the establishment of an Employees' State Insurance (ESI) dispensary in our constituency, where currently there are none. This dispensary would play a vital role in providing essential healthcare services to the working class including the temporary workers, promoting their wellbeing, and ensuring their access to quality and cost effective medical facilities. It is essential to highlight that earlier attempts to establish an ESI dispensary in our area were unfortunately hindered by unforeseen events, most notably the global Covid-19 pandemic. The pandemic had far reaching consequences on various aspects of society, causing delays and disruptions in many developmental projects. While we were committed to this cause before, we must now reinvigorate our efforts and place it at the forefront of our priorities. The absence of an ESI dispensary in our Parliamentary Constituency has been a persistent concern for our constituents. Hence, I urge upon the Government for establishing an ESI dispensary in our parliamentary constituency. This step will not only provide essential healthcare services to the working class but also demonstrate our commitment to their welfare.
