## Use of chemical mintures and insecticides

3676 SHRI PARASRAM BHARD-WAJ: Will the Minister of AGRICUL-TURE be pleased to state;

- (a) whether it is a fact that agricultural production has increased due to increasing use of chemical mixtures and insecticides but poison percolates in the agricultural produce and it is slowly going into the body of human being consuming the agricultural produce and posing a danger to human life;
- (b) if so, whether Government have paid any attention to this problem and carried out experiments in this regard; and
  - (c) if so, the details thereof?

THE MINISTER OF STATE IN THE DEPARTMENT OF AGRICULTURE (SHRI R. PRABHU): (a) Yes, Sir. The insecticides belong to a group of chemicals which have helped in sustaining the agricultural production by minimising/eliminating the losses which might otherwise be caused by the crop pesis and diseases. From the very beginning of the 6th Five Year Plan, concerted efforts have been made by the concerned Central, and

State Government organisations to recommend less persistent and easily bio-degradable insecticides for use in agriculture to avoid problems arising out of residues of persistent type of insecticides which capable of accumulating in human body the food chain (agricultural produce). Such efforts are being further strengthened during the 7th Five Plan Some studies conducted by the national laboratories had revealed the of such insecticides in human presence tissues but no definite conclusion could be drawn as to their being a danger to human lite.

- (b) and (c) The Government have paid adequate attention to the problem referred to and has taken the following action:
  - (i) The Institutes under Indian Council of Agricultural Research and Agricultural Universities have screened a large number of insecticides for recommending safer and effective Insecticides for use in agriculture.
  - (ii) Studies have been undertaken by the Agricultural Research organsations to determine the residues of insecticides on agricultural produce for recommending safetyinterval; to avoid the risk of insecticides residues to human beings

Madras

92

(ifi)

- The tolerance limits for a number of insecticides have been prescribed under the Prevention of Food Adulteration Act, 1954, to enable monitoring of Agricultural commodities from the view point of insecticides as well. Under the Insecticides Act, 1968, the registration of insecticides is mandatory before they could be imported/ manufactured in the country. Committee Registration The constituted under the Act has laid down elaborate guidelines for data generation which encompassess the date on insecticides residues and their effect on animals and human beings. Conseinsecticides quently, only safer with suitable precautions are being registered for use in the country.
- (Iv) The Indian Council of Agricultural Research has launched an All Indian Coordinated Project on Pesticides Residues for further streamlining the use of insecricldes with special refrence to their residues on agricultural produce.
