

(c) Andhra Pradesh and Karnataka have represented for increase in their poverty lines on the ground that the consumer price index for their states reflects the effect of subsidies to foodgrains. Orissa has represented for increase in its poverty line.

(d) The poverty lines are worked out on the basis of the recommendations of the Expert Group on Estimation of Proportion and Number of Poor, which after considering alternative methods of computing poverty line, recommended use of state specific poverty lines. The state specific poverty line are obtained by desegregating the national level poverty line by state specific price indices and inter-state price differential. These state-specific poverty lines reflect the cost of the consumption basket considered to be the minimum for healthy living, at prices prevailing in the state, and hence depicts a true picture.
