

## **Regarding need to promote private solar plants in Bundelkhand region-laid**

**SHRI ANURAG SHARMA (JHANSI):** Solar energy is defined as solar radiation that is capable of creating heat, activating chemical processes, or generating electricity. The overall quantity of solar energy incident on Earth exceeds the world's present and projected energy needs. The goal of a trillion-dollar economy too should be achieved in a manner so that the income generation is faster in relatively backward regions like Bundelkhand. Out of the total investment proposals received at the Global Investors Summit-2023, about 12% is earmarked for Bundelkhand. The challenge is to quickly bring this investment to the ground. To deal with the situation, the Government may like to increase the installation of Solar Panels in the Bundelkhand Region so that the power generated from solar energy can be gainfully utilized. Therefore, we also request to install and promote private solar plantations in the Bundelkhand region as there is direct exposure to sunlight. This will create a great impact in terms of employment as well for the local citizens.
