

Regarding need to take steps for revival of Ramzan River in Kishanganj-laid

DR. MOHAMMAD JAWED (KISHANGANJ): The Ramzan river, which flows through the heart of the Kishanganj town, is in a dismaying state and has become a cause for distress among the local residents. For many years, we have heard promises and discussions about the revival and beautification of the Ramzan River. However, it is disheartening to note that, despite these assurances, the river's condition has not seen any significant improvement. Regrettably, it has now degraded to the point where it is resembling more of a drain than a river, putting its very existence at risk.

Assessment and Action Plan: Conduct a thorough assessment of the current state of the Ramzan River and formulate a comprehensive action plan for its revival and beautification.

Pollution Control and Removal of Encroachment: Implement stringent measures to control pollution in the Ramzan River, addressing both point and non-point sources of contamination and remove all encroachments.

Timeline for Action: Provide a clear timeline for the execution of the action plan, along with regular updates to the public to foster transparency and accountability.

Budget Allocations: Allocate sufficient funds for the implementation of the revival plan, recognising the importance of preserving this natural resource for the well-being of the community.
