

## **Regarding investment in Rubber Research Station at Kanyakumari-laid**

**SHRI VIJAYAKUMAR ALIAS VIJAY VASANTH (KANYAKUMARI):** I would like to highlight the profound significance of the Rubber Research Station in Kanyakumari. This institution stands as a cornerstone of agricultural innovation, dedicated to advancing the science and practice of rubber cultivation. Located amidst the verdant landscapes of Kanyakumari, the Rubber Research Station plays a pivotal role in developing resilient rubber varieties suited to local climatic conditions. Through cutting-edge research and collaboration with farmers, it fosters sustainable practices that enhance productivity and profitability. Moreover, this station serves as a hub of knowledge dissemination, equipping farmers with the latest techniques and innovations in rubber cultivation. By promoting best practices and providing technical support, it empowers local communities and strengthens the agricultural backbone of our country. As we navigate the challenges posed by climate change and global market dynamics, the role of the Rubber Research Station becomes increasingly critical. Its research efforts not only bolster resilience against environmental stressors but also drive forward our nation's agenda towards agricultural self-sufficiency and economic prosperity. In conclusion, I call upon all stakeholders and the Ministry of Commerce to continue supporting and investing in the Rubber Research Station at Kanyakumari. Together, let us harness its potential to shape a sustainable future ensuring prosperity for generations to come.
