**Answer**

THE MINISTER OF STATE IN THE MINISTRY OF COMMERCE AND INDUSTRY (SHRI JYOTIRADITYA M. SCINDIA)

(a) & (b): The year-on-year growth rate of Exports and Gross Domestic Product (GDP) at factor cost(current prices) during 2008-09, 2009-10 and 2010-11 is given in Table 1. While the growth rate of exports has been higher than that of the GDP in 2008-09 and 2010-11, in 2009-10 the situation was different due to the global financial crisis.

Table 1 : Year -on-year growth rate of Exports and GDP (%)

	2008-09	2009-10	2010-11
Exports (in Rupee terms)	28.2	0.6	32.3
GDP at Factor Cost (at Current Prices)	15.3	16.1	19.1

(c): The World Trade Organisation (WTO) publishes statistics on country-wise, share in merchandise exports and imports (broad item-wise in value terms). India's share and position in overall world merchandise exports and imports in 2007, 2008 and 2009 is at Annexure I. India's share in world merchandise exports and imports value-wise and broad item-wise as per World Trade Organisation data is at Annexure II.

(d): Incentives/measures announced in the Annual Supplement to the Foreign Trade Policy released on 23rd August, 2010 and additional measures announced on 11th February 2011 are at Annexure III.

(e): The year-wise exports, imports and exchange rate (Rupee/US dollar) in the last three years is given in the Table 2. Trade depends on a number of factors including world income and demand, trade policies of countries, competitiveness of products and services, exchange rate, etc.. During the last three years, no direct relation has emerged between exchange rate and our trade performance. Data on exchange rate, export and import (item-wise) is not maintained.

Table 2 : Trade and Exchange Rate

Rupee US \$	Exports	Imports		
Exchange rate	(US\$ billion)	(Rs.Crore)	(US\$ billion)	(Rs.Crore)

2008-09	45.99	185.3	840755	303.7	1374436
