- (d) the time by which each river linking is likely to be started/completed along with the benefits likely to accrue therefrom?

Answer

THE HON'BLE MINISTER FOR WATER RESOURCES, RIVER DEVELOPMENT & GANGA REJUVENATION (SUSHRI UMA BHARTI)

(a) This Ministry has formulated a National Perspective Plan (NPP) for Water Resources Development envisaging inter-basin transfer of water from surplus basins to deficit basins/ areas. Based on surveys, investigations and detailed studies, National Water Development Agency (NWDA) has prepared pre-feasibility reports which facilitated identification of 30 links under the NPP. The status of river links identified under NPP are given in Annexure-I. Based on the concurrence of the States, Detailed Project Reports (DPR) for Ken-Betwa, Damanganga-Pinjal and Par-Tapi-Narmada links have been completed by NWDA.

The initial cost of the Inter Linking projects as estimated in Preliminary Studies at Pre-feasibility/Feasibility stage by the then Task Force on Interlinking of Rivers (TF-ILR-2002) is Rs 5.60 Lakh crore at 2002 Price Level. The expenditure on inter-linking projects can be estimated only after completion of Detailed Project Reports (DPRs) of individual link projects. The estimated expenditure of link projects for which Detailed Project Reports have been completed is given at Annexure-II.

(b) The Government is pursuing the Interlinking of River program in a consultative manner. Its implementation is dependent upon the consensus and co-operation of the concerned States and upon obtaining various mandatory clearances from Ministry/ Departments of Central and State Governments including statutory clearances. The details of objections raised by concerned State Governments including Rajasthan for taking up Feasibility Report (FR)/DPR of proposed inter-linking of river projects are given at Annexure III.

(c) Ministry of Water Resources, River Development & Ganga Rejuvenation has kept an amount of Rs. 280 cr in 12th Five year plan, for preparation of Pre-feasibility Report (PFR), Feasibility Report (FR) and Detailed Project Report (DPR) for the various river-link projects. The budgetary provision for preparation of Feasibility Reports (FRs) and Detailed Project Report (DPR) for the last three Financial Year viz. 2012-13, 2013-14 and 2014-15 is Rs. 51.30 cr., Rs. 63.20 cr., and Rs. 60.0 cr. respectively, and for Fiscal Year 2015-16 Rs. 69.0 cr. has been allocated. The expenditure has been incurred for studies for establishing viability of the proposals from hydrological and technical angles. The expenditure incurred, is not maintained project-wise/State-wise.

(d) The time limit for the completion of individual link project can be identified only after Detailed Project Reports are techno-economically approved. The implementation of National Perspective Plan for water Resources Development would create an additional irrigation potential of approximately 35 million hectare and generate 34000 mega watts (MW) hydro power apart from the incidental benefits of flood moderation, navigation, drinking and industrial water supply, fisheries, salinity and pollution control etc.
