

Title: Need to set up a science centre and a planetarium in Chandigarh.

SHRI PAWAN KUMAR BANSAL (CHANDIGARH): Sir, Chandigarh can rightfully claim to have a good standard of education. The performance of even the Government schools is perhaps the best in the country. However, with the rapid developments in the field of science and technology, particularly, the Information Technology and marvels of outer space and the solar system are still unravelling themselves. It is imperative that Chandigarh is given particular attention by the Government of India to provide its students the latest knowledge about the fast moving world. In this context, there is need to develop a modern science centre and a planetarium in Chandigarh city. I urge upon the Government to take up these projects on priority.
