

Title: Need to solve acute drinking water problem in Boden block, Nuapara District, Orissa.

SHRI BIKRAM KESHARI DEO (KALAHANDI): Sir, there is acute drinking water shortage in the Boden block in Nuapara District of Orissa and most of the Gram Panchayats and village tubewells are affected by fluoride content thereby causing fluorosis among the users. So, it is my demand that immediate action be initiated to provide potable drinking water from the nearby river Sunder from the Central funds, as the scheme has already been sent to the Centre.
