Title: Closure of NECL's hospital in West Bengal owing to transfer of all physicians.

SHRI BIKASH CHOWDHURY (ASANSOL): Sir, the North East Coal Field Limited in Assam has transferred all the physicians from the hospitals. These coal mines are situated in the Far East or North Eastern Assam. There are about 5,000 workers working in those mines, just on the border of Burma and Arunachal Pradesh. They remain unattended and so, they have demanded that those who had been transferred should be re-transferred to that place because the physicians from outside are not ready to go there, since the place is infested with ULFA. So, I urge upon the Minister-concerned to re-transfer all the physicians to the hospitals of North-East Coal Field Limited. Thank you.
