Title: Need to take preventive steps for eradication of "Muscular Dystrophy" an incurable disease - Laid.

SHRIMATI PRATIBHA SINGH (MANDI): I would like to draw the kind attention of the Government regarding the disease Muscular Dystrophy. As you know this is a progressive disease. This disease is spreading its tentacles at an alarming rate. At present, this disease is incurable and no medicine has been found so far to check it and research is going on. The success of research seems to be a distant dream. I request the Government to take necessary steps to eradicate this disease and declare it as one of the disabilities. I, further, suggest that efforts be made to create nationwide awareness about this disease through audio-video, posters, pamphlets, seminars and camps etc. Correct and timely management of this disease can benefit the vulnerable people to a large extent.

Therefore, I fervently request you kindly to take necessary steps to eradicate this disease and declare it as one of the disabilities.
