Title: Prime Minister made a statement regarding current economic situation in the country.

-

MADAM SPEAKER: Yes, the hon. Prime Minister, now.

THE PRIME MINISTER (DR. MANMOHAN SINGH): Madam Speaker, the movement of the exchange rate of the Indian Rupee recently has been a matter of concern. The Rupee has depreciated sharply against the dollar since the last week of May. There are concerns; and justifiably so, of the impact this would have on our economy.

Madam, what triggered the sharp and sudden depreciation was the markets' reaction to certain unexpected external developments. On May, 22, 2013, the United States' Federal Reserve indicated that it would soon taper its Quantitative Easing as the US economy was recovering. This led to a reversal of capital flows to Emerging Economies, which are now sharply pulling down not just the Rupee but also the Brazilian Real, the Turkish Lira, the Indonesian Rupiah, the South African Rand and many other currencies.

While global factors such as tensions over Syria and the prospect of the US Federal Reserve tapering its policy of Quantitative Easing have caused general weaknesses in the Emerging Market currencies, the Rupee has been especially hit because of our large Current Account Deficit and some other domestic factors. We intend to act to reduce the Current Account Deficit and bring about an improvement in the functioning of our economy.

In 2010-11 and the years prior to it, our Current Account Deficit was more modest and financing it was not difficult, even in the crisis year of 2008-09. Since then, there has been a deterioration, mainly on account of huge imports of gold, higher costs of crude oil imports and recently, of coal. On the export side, weak demand in major markets has kept our exports from growing. Exports have been further hit by a collapse in iron ore exports. Taken together, these factors have made our Current Account Deficit unsustainably large.

Clearly, Madam, we need to reduce our appetite for gold, economise in the use of petroleum products and take steps to increase our exports.

We have taken measures to reduce the Current Account Deficit. The Finance Minister has indicated that it will be below \$ 70 billion this year, and we will take all possible steps to ensure that outcome. These are already showing results with a declining trade deficit in both June and July. The Government is confident that we will be able to lower our Current Account Deficit to \$70 billion. Our medium term objective is to reduce the Current Account Deficit to 2.5 per cent of our GDP. Our short term objective is to finance the current account deficit in an orderly fashion. We will make every effort to maintain a macro economic framework friendly to foreign capital inflows to enable orderly financing of the Current Account Deficit.

Madam Speaker, coming back to the effects of the Rupee depreciation, we must realise that part of this depreciation was merely a needed adjustment. Inflation in India has been much higher than in the advanced countries. Therefore, it is natural that there has to be a correction in the exchange rate to account for this difference. To some extent, depreciation can be good for the economy as this will help to increase our export competitiveness and discourage imports.

There are many sectors which are regaining competitiveness in export markets as a result of the fall in the exchange rate. Over the next few months, I expect the effects of this to be felt more strongly, both in exports and in the financial position of exporting sectors. This in itself would correct the Current Account Deficit to some extent.

However, foreign exchange markets have a notorious history of overshooting. Unfortunately, this is what is happening not only in relation to the Rupee but also other currencies.

The Reserve Bank and the Government have taken a number of steps to stabilize the Rupee. Some measures have given rise to doubts in some quarters that capital controls are on the horizon. I would like to assure the House and the world at large that the Government is not contemplating any such measures. The last two decades have seen India grow as an open economy and we have benefited from it. There is no question of reversing these policies just because there is some turbulence in capital and currency markets. The sudden decline in the exchange rate is certainly a shock, but we will address this through other measures, not through capital controls or by reversing the process of reforms. The Finance Minister has clarified this matter at length, and I take this opportunity to reaffirm our position.

Madam Speaker, Ultimately, the value of the Rupee is determined by the fundamentals of our economy. While we have taken a number of actions to strengthen those fundamentals, we intend to do more.

Growth has slowed in recent months. I expect growth in the first quarter of 2013-14 to be relatively flat, but as the effects of the good monsoon kick in, I expect it to pick up.

There are many reasons for this optimism. The decisions of the Cabinet Committee on Investment in reviving stalled projects will start bearing fruit in the second half of the year. The full effects of the growth friendly measures that have been taken over the last six months, such as liberalizing norms for Foreign Direct Investment, resolution of some tax issues of concern to industry and fuel subsidy reform will come into play over the year, resulting in higher growth particularly in manufacturing. Exports are also starting to look up as the growth performance of the rest of the world is showing signs of improving. So, I believe growth will pick up in the second half of the fiscal year barring extreme unforeseen eventualities.

Madam, there are questions about the size of the fiscal deficit. The Government will do whatever is necessary to contain the fiscal deficit to 4.8 per cent of GDP this year. The most growth-friendly way to contain the deficit is to spend carefully, especially on subsidies that do not reach the poor, and we will take effective steps to that end.

Madam, inflation measured by the Wholesale Price Index has been coming down, even though inflation measured by the Consumer Price Index is still too high. Depreciation of the Rupee and rise in Dollar prices of petroleum products will no doubt lead to some further upward pressure on prices. The Reserve Bank will therefore continue to focus on bringing down inflation. The favourable monsoon and the anticipated good harvest will help bring down food prices and ease the task of controlling inflation.

All in all, the macro-stabilization process, which should support the value of the Rupee, is under way. I expect that as the fruits of our efforts materialize, currency markets will recover.

Madam Speaker, even while we go about doing what is necessary, it is important to recognize that the fundamentals of the Indian economy continue to be strong. India's overall public-debt to GDP ratio has been on a declining trend from 73.2 per cent of GDP in 2006-07 to 66 per cent in 2012-13. Similarly, India's external debt is only 21.2 per cent of our GDP and while short-term debt has risen, it stands at no more than 5.2 per cent of our GDP. Our foreign exchange reserves stand at US\$ 278 billion and are more than sufficient to meet India's external financing requirements.

Madam, many foreign analysts worry about banking problems that may arise in the wake of the currency crisis. The Indian banking sector has been seen some rise in bad debts. The question that needs to be asked is whether there is a liquidity problem or a solvency problem for the borrowers.

My belief is that there is a liquidity problem. Many of the projects are not unviable but only delayed, in contrast to the over-building that has characterised the banking sector problems in many other countries. As these projects come on stream, they will generate revenue and repay loans. Our banks are, fortunately, well capitalised, much above the Basel norms and they have the capacity to provide for any non-performing assets until those assets are turned around.

Madam Speaker, the easy reforms of the past have been done. We have the more difficult reforms to do, such as reduction of subsidies, insurance and pension sector reforms, eliminating bureaucratic red-tape and implementing Goods and Services Tax. These are not low hanging fruit and they need active political consensus.

It is here that I urge hon. Members across the political spectrum to reflect on the need of the hour. Many laws that are necessary are held up for lack of political consensus. Reforms such as the Goods and Services Tax, which everyone agrees is essential to restore growth and boost revenues, require States to come to an agreement. We need to forge consensus on such vital issues. I urge political parties to work towards this end and to join in the Government's efforts to put the economy back on the path of stable, sustainable growth.

Madam, there may be short-term shocks to our economy and we need to face them. That is the reality of operating in a globalised economy, whose benefits we have reaped over the last 15 to 20 years. We will need to ensure that the fundamentals of the economy remain strong so that India continues to grow at a healthy rate for many years to come. That

we will ensure. We are, no doubt, faced with important challenges, but we have the capacity to address them. It is at times like these that the nation shows what it is truly capable of.
