Title: The issue of missing children in the country.

SHRI RABINDRA KUMAR JENA (BALASORE): Data on missing children shows that over 3.25 lakh children went missing between 2011 and 2014 (till June) on an average of nearly 1 lakh children going missing every year. More worryingly, 55% per cent of those missing are girls and 45% of all missing children have remained untraceable as yet raising fears of them having been either killed or pushed into begging or prostitution rackets. Therefore, I urge the Government to create a high level task force to look into this matter and formulate a detailed and implementable plan to intervene in this matter and solve the missing children problem in our country.
