Title: Need to take urgent steps to control spread of swine flu in Andhra Pradesh and Telangana.

SHRI Y.V. SUBBA REDDY (ONGOLE): Several parts of Andhra Pradesh and Telangana are in the severe grip of swine flu. Hundreds of people have been infected by this swine flu and several have died so far in these two states. While the infectious disease is spreading fast in other parts of the two states, the state Governments are still assessing the availability of medicines, necessary arrangements in hospitals etc.

I, therefore, urge upon the Central Government to take urgent steps to control the disease so that the lives in the two states are saved.
