Title: Need to implement Rotation of Headship Policy in the Departments of AIIMS.

SHRI PARVESH SAHIB SINGH VERMA (WEST DELHI): AIIMS is a premier institute of national importance that probably gets maximum budgetary support from the Government as compared to any other health institution in our country. It has approximately 800 faculties in roughly 50 departments. Over the period of time, a number of administrative reforms have been attempted. Unfortunately, the reforms were sidelined because of poor administration of the previous Government. One such major administrative reform was 'Rotation of headship policy, in the departments. This policy aimed at smooth functioning of the departments and equitable distribution of resources to every faculty member of the institution. There have been many recommendations including referendums of rotation of headship and also for rotation of headship. The Health Minister of Government of India who is also an ex-officio President of AIIMS had constituted a committee under the chairmanship of Dr. M.K. Bhan to facilitate the implementation of rotation of headship at AIIMS. The policy of rotation of Headship is in accordance with the motto of our Government's Sabka Saath, Sabka Vikas.

I draw the attention of Hon'ble Minister to take notice of the recommendations and remove all roadblocks in bringing in this administrative reform.
