title: Need to increase allocation of CNG for transport and power sector in Telangana.

-

DR. BOORA NARSAIAH GOUD (BHONGIR): Telangana is a land locked state. The state is located strategically from security point of also. As per the Bhure Lal committee, Telangana state (Hyderabad) needs to operate at least 350 buses, however because of lack of CNG, TSRTC is operating only around 200 CNG buses.

In this regard we request the Ministry of Petroleum and Natural Gas to increase allocation of CNG for the transport sector in Telangana and also allocate CNG for power sector besides setting up of oil refinery and increasing storage in the State.
