Title: Need to construct a ramp for the foot-over-bridge at Khamargachi Railway Station in West Bengal.

DR. RATNA DE (NAG)(HOOGHLY): There has been a long pending demand for construction of a ramp for the foot over-bridge at Khamargachi Station of Howrah Division, Eastern Railway. At present, the passengers have to climb 220 steps on one side to cross the foot over-bridge at the said station. Due to the foot-over bridge, passengers take a convenient route, which is very dangerous i.e. crossing the tracks to buy tickets at the Booking counter which is located at a distance. Ladies, children, differently-abled persons, students, elderly persons find it difficult to use the foot-over bridge at Khamargachi station. This bridge should be dismantled and a ramped one like one in Habib Ganj Station (Bhopal) which is easy for everyone to climb or walk be constructed. Hence, I would urge the Hon'ble Minister of Railways to construct a ramp for using foot-over bridge at Khamargachi station of Howrah Division, Eastern Railway.
