**Title:** Need to re-start work of Sardar Sarovar Dam Project over Narmada river in Gujarat.

SHRI P.S. GADHAVI (KUTCH):

The Kutch Distt. and some parts of the Saurashtra and North Gujarat areas of Gujarat State are facing acute shortage of drinking water and due to salinity ingress in these areas and paucity of underground water for agricultural purpose. Water from Narmada river is the only solution. Therefore, it is very much necessary to re-start the work of Sardar Sarovar Dam Project over Narmada River in Gujarat State. For that Central Government should declare this project as National Project without loss of any time and disputes among the MP and Gujarat should be resolved immediately and Hon'ble Supreme Court be approached to expedite the case pending before it.
