

Title: Need to ensure availability of drinking water to all in the country by 2000 AD.-Laid

DR. B.N. REDDY (MIRYALGUDA): In spite of the importance of drinking water supply mentioned in the National Agenda by the Central Government and the assurance given to the people by the responsible persons, the state of affairs is very bad, when we go to the villages, where we find our women in the countryside walking miles together to fetch water. I request through you, Sir, that this Government should take this item very seriously and do take the necessary measures to provide drinking water (potable) to all in the country by 2000 A.D.
