Title: Need to set up a cyber security authority in the country.

PROF. RICHARD HAY (NOMINATED): Digitization has become the order of the day in the country. The number of transactions using the digitization mode has been increasing day by day.

But at the same time cyber-related crimes are on the increase. There are possibilities that foreign countries are penetrating into the huge data on the digital platform.

Therefore, it is urged upon the Government of India to set up a cyber security authority to address the serious issues of cyber crime.
