UNSTARRED QUESTION NO.700
TO BE ANSWERED ON 14.12.2018

Rejuvenation of Rivers

700. SHRI C.N. JAYADEVAN:
SHRIMATI RAKSHATAI KHADSE:

Will the Minister of ENVIRONMENT, FOREST AND CLIMATE CHANGE be pleased to state:

- (a) whether the number of polluted and critically polluted stretches of rivers in the country has increased as per the recent assessment by the Central Pollution Control Board;
- (b) if so, the details thereof and the reaction of the Government thereto;
- (c) whether the Government proposes new strategy for rejuvenation of rivers and making a rejuvenation plan for selected stretches of rivers in initial stages for conservation as the present strategy is limited only to tackling pollution load from domestic wastewater and regulation of industrial pollution;
- (d) if so, the details of the new plan; and
- (e) whether any stretches have identified in this regard and if so, the list of the stretches of the rivers identified thereof?

ANSWER

MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT, FOREST AND CLIMATE CHANGE (DR. MAHESH SHARMA)

(a) & (b) Central Pollution Control Board (CPCB) in collaboration with the State Pollution Control Boards is regularly monitoring the water quality of rivers across the country through a network of monitoring stations under the National Water Quality Monitoring Programme. Based on monitoring results in terms of Bio-chemical Oxygen Demand (BOD) levels, a key indicator of organic pollution, CPCB identifies the polluted river stretches in the country. As per the report published by CPCB in February 2015, 302 polluted river stretches were identified on 275 rivers. In the latest CPCB report of September 2018, 351 polluted river stretches have been identified on 323 rivers, as per details at *Annexure*. The increase in polluted river stretches can be attributed to increase in number of rivers being monitored and number of water quality monitoring stations over the years (from 1275 monitoring stations in 2015 to 1822 monitoring stations at present) as well as increase in pollution loads, primarily due to rapid urbanization.

(c) to (e) The strategies for conservation and rejuvenation of rivers in the country are revised from time to time in consultation with the State Governments and is an ongoing process. Works are taken up in identified polluted river stretches under the National River Conservation Plan on the basis of conformity with the guidelines, pollution status, prioritization, willingness of the State Governments to contribute their matching share and availability of Plan funds, and incorporation of appropriate strategies.
