(c) the mechanism devised to ensure availability of the salt with requisite content of iodine?

THE MINISTER OF HEALTH AND FAMILY WELFARE (SHRI NILAMANI ROUTRAY): (a) to (c). There have been instances where iodised salt samples drawn from the markets in various States and UTs were found not to contain the prescribed quantity of iodine. The States Governments and the U.Ts. Administrations take necessary action against the erring parties under the Prevention of Food Adulteration Act.

The Salt Commissioner is providing guidance and training in operation and quality control to the iodised salt manufacturers. Rejection of claims of subsidy, issue of show cause notices, suspension of permission to manufacture iodised salt are some of the measures adopted by the Salt Commissioner to improve the quality of iodised salt. The present strategy is to increase the availabilitv of iodised salt in the market to persuade the iodised salt manufacturers to use better packing for retaining the level of iodisation for longer periods. Randoms samples are drawn from the market by the Salt Commissioner for analysis to study the quality of iodised salt available to the consumers.
