(vii) DECLARATION OF LADAKH AS SCHEDULED AREA

DR. KARAN SINGH (Udhampur): Ladakh is one of the most sensitive and backward areas in the country. Although the population is small, it covers a huge area not occupies one of the most important locations on our northern borders. area has been subject to aggression and many thousands of square miles of Indian territory are still under adverse occupation. In view of this. I have been stressing for many years that a special administrative structure should be developed in this area to expedite economic development and meet the urges and aspirations of the people. Unfortunately, this has and the present State been done, Government continues its attitude of neglect against Ladakh.

As a result of this, there have been distrubances in Zanskar and Leh recently, and over the last week the situation has deteriorated and the police has indulged in lathi-charge and other repressive activities, I would urge that the Government of India should take cognisance of the situation in Ladakh before it deteriorates further, and should take effective steps to ensure the welfare and the progress of the people living in Ladakh. My suggestion is that Ladakh should be declared a Scheduled Area so that, while remaining a part of Jammu and Kashmir State, it re-Then only ceives Special attention. will our larger national and strategic interests in the area be fully safeguarded.
