2. For up-dating the poverty line for 1987-88 C.S.O. Private Consumption deflator has been used.
3. These calculations are based on the draft report of 43rd Round of National Sample Survey data on house-hold consumer expenditure (Report No. 372, "Report on the Fourth Quinquennial Survey on Consumer Expenditure, N.S.S.O., June 1990").
4. The number of people below poverty line relates to the population as on 1st March, 1988.
5. State-wise poverty ratios have been estimated using the same methodology as was used at the time of formulation of Seventh Five Year Plan. Since then a number of issues have been raised about the methodology of poverty estimation and these issues are being considered by an expert group headed by Dr. D.T. Lakdawala.
6. The estimates presented here are likely to get revised in the light of the recommendations of the Expert Group.
