

these organisations that they will be made sick in less than four hundred or five hundred hours of working and they will be either utilised indirectly by some private individuals or thrown as junk. Whether it is the property of the public sector or the private sector, it is a national asset and so it has to be put to use continuously. Keeping this machinery idle on account of a major breakdown or overhaul, is a great loss to the nation.

Already promised by the Minister I would like to know from him whether he will take care of all such public sector undertakings under him as such large machinery is being purchased and made as junk in no time and see that this is not continued in future and a decision is taken immediately to dispose it of in the open auction instead of keeping it idle for years together.

SHRI ARIF MOHAMMAD KHAN: The reply that I had given was in relation to the point made by the hon. Member disputing the figures which have been given in the answer. As far as the figures which are given in the answer are concerned, I would like to mention that they are percentage achievement of availability. This is in the context of the figures which are given in the answer. The availability against the norms upto the third quarter of 1989-90 in Coal India Ltd. is as follows:

Dragline	—	91%
Shovel	—	81%
Dumper	—	82%
Dozer	—	75%

That is not very much on the higher side. Still, as I said earlier, it is a continuous process. We are making efforts to see that these are put back into service as soon as possible.

SHRI ANIL SHASTRI: I would like to know from the Minister whether these shovels which have been purchased are very expensive and whether they are manufac-

tured in India. I would also like to know from the Minister where from these shovels are purchased.

SHRI ARIF MOHAMMAD KHAN: Most of the manufacturers are indigenous manufacturers. Some of them are HML, GMMCO BEML, KCL, L&T, Premnath Diesels. Most of these are indigenous sources.

WRITTEN ANSWERS TO QUESTIONS

[English]
