Irrigation is a State subject and water rates for irrigation supplies are fixed by the State Governments. Water rates at present fixed by the States are not adequate to meet the total working expenses and interest charges. The question of increasing and rationalising the water rates has been considered at a number of conferences and meetings. The State Governments have generally responded to the need though the increase in water rates has not been as much as recommended in these conferences. There is no proposal to rationalise water rates according to size of holdings.
